## RESEARCH EXPERIENCE

---

### RFF-CMCC European Institute on Economics and the Environment, Affiliated Scientist

Milan, IT

*CAPABLE- Climate Policy Acceptability Economic Framework WP2, WP4*

Sep 2024 – Present

- Developed web scraping pipeline to create a dataset of publicly available information on members of European Parliament and analyzed data for a research project on the discrepancy between policymakers' perception of public opinion on climate issues
- Used the Manifesto API to gather text data to implement a project on climate salience in electoral manifestos of EU parties using a computational text analysis approach
- Implemented survey tool

### Bocconi University, Research Assistant

Milan, IT

*GREEN LAB, Ecological Transition and Spatial Equity Project*

April 2024 – Aug 2024

- Helped in the creation of large datasets (using QGIS and R) of global geolocalized data (CO2 emissions, urban shape, desertification, migration, socio-economic data)
- Analyzed the relationship between urban form & GDP in Italian regions by calculating a rank size indicator based on previously created datasets

### Harvard Business School, Predoctoral Fellow

June 2024 - Present

- Led data collection as primary contact for local survey firm, conducted data analysis for a randomized controlled trial
- Contributed to drafting a pre-analysis plan, developed interview questions, assisted in drafting literature reviews
- Utilized QGIS to classify local markets
